

## SERIES ULS-2800H AND ULS-2800R HIGH-VOLTAGE, HIGH-CURRENT DARLINGTON ARRAYS MIL-STD-883 Compliant

### FEATURES

- TTL, DTL, PMOS, or CMOS Compatible Inputs
- Peak Output Current to 600 mA
- Transient-Protected Outputs
- Side-Brazed Hermetic Package
- Cer-DIP Hermetic Package
- High-Reliability Screening to MIL-STD-883, Class B
- $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$  Temperature Range

**D**EIGNED TO SERVE as interface between low-level logic circuitry and high-power loads, Series ULS-2800H and ULS-2800R arrays consist of eight silicon NPN Darlington power drivers on a common monolithic substrate. They are ideally suited to driving relays, solenoids, lamps, and other devices in high-reliability military or aerospace applications with up to 3 A output current per package.

These devices are screened to MIL-STD-883, Class B and are supplied in either the popular glass/metal side-brazed 18-pin hermetic package (suffix 'H') or ceramic/glass cer-DIP hermetic package (suffix 'R'). Both package styles conform to the dimensional requirements of MIL-M-38510 and are rated for operation over the full military temperature range of  $-55^{\circ}\text{C}$  to  $+125^{\circ}\text{C}$ . Reverse bias burn-in and 100% high-reliability screening are standard.

The 30 integrated circuits described in this bulletin permit the circuit designer to select the optimal device for any application. In addition to the two package styles, there are five input characteristics, two output-voltage ratings, and two output-current ratings. The appropriate part for specific applications can be determined from the Device Part Number Designation chart. All units have open-collector outputs and on-chip diodes for inductive-load transient suppression.

Note 1: All limits stated apply to the complete Darlington series except as specified for a single device type.

Note 2: The  $I_{IN(OFF)}$  current limit guarantees against partial turn-on of the output.

Note 3: The  $V_{IN(ON)}$  voltage limit guarantees a minimum output sink current per the specified test conditions.

## HERMETIC GLASS/METAL 'H' PACKAGE

### DIMENSIONS IN INCHES

### DIMENSIONS IN MILLIMETERS

Based on 1" = 25.4 mm

This package conforms to military specification MIL-M-38510, case outline D-6, configuration 3. Devices using this package are marked to indicate compliance to the latest issue of MIL-STD-883. For example: ULS2801H-883.

## HERMETIC CERAMIC/GLASS 'R' PACKAGE

### DIMENSIONS IN INCHES

### DIMENSIONS IN MILLIMETERS

Based on 1" = 25.4 mm

This package conforms to military specification MIL-M-38510, case outline D-6, configuration 1. Devices using this package are marked to indicate compliance to the latest issue of MIL-STD-883. For example: ULS2803R-883.

### NOTES:

1. Lead spacing tolerance is non-cumulative.
2. Exact body and lead configuration at vendor's option within limits shown.
3. Lead gauge plane is 0.030 in. (0.76 mm) max. below seating plane.
